Solutions to Move Your Product

Call Center Management Services

Contact Center Services

With complete fulfillment, packaging and distribution services, processing your products can be accomplished seamlessly. We also have space available in our warehouse for inventory storage. Leave the order processing and shipping to us so you have more time to run your business. All of our services are available to you, regardless of the size of your product. We service companies across a wide section of industry including electronics, food and grocery, general merchandise, health and beauty, paper products, pharmaceuticals and nutraceuticals. From start to finish we offer the market's most cost effective solutions for:

Packaging – We provide a variety of high speed, high quality packaging services for businesses of all sizes. By outsourcing your packaging needs, you can overcome tight deadlines, machine space requirements, an expensive workforce and projects beyond your current capabilities. From simple projects to the most delicate of tasks, our extensive investment in equipment, staff and technology provide ability to execute your assignment beyond expectations. Our state of the art facilities and resources allow us to not only meet your project deadlines but will help reduce your costs and stress by focus on the sales and marketing of your product.

Fulfillment – No matter how big or small the job, we provide comprehensive processing associated with your product. This includes materials handling, incoming inspections, inventory tracking, product assembly, order processing and shipping. Our experienced teams are focused on producing quality and can be scheduled as you need them.

Distribution - We understand the importance of order accuracy and have high standards for shipping of all items. All orders go through a three stage inspection before leaving the facility. Our scanning system allows for precise order handling with lot and date code traceability. We offer specialty labels and first class packing. We guarantee your orders will arrive on time and in excellent condition.

Warehousing – We have several thousand square feet of secure, climate controlled space dedicated to holding our client inventory. Our warehousing services include food grade, pallet and bulk storage, computerized inventory control, FIFO stock rotation, bar coding, RF Scanning, small package fulfillment (UPS, FEDEX, DHL and USPS) to name a few. Your product can be assembled, packed and stored securely as needed until you are ready to ship.

Quality – Quality control is the key to ensure long term relationships with our customers. A key ingredient to quality is the daily verification of raw materials when they first arrive at our facility. As part of our process, all products packaged or assembled are packed under GMP standards and are built first in our materials program thus ensuring precision and accuracy throughout assembly and execution of your project. Our quality starts and ends with excellence; attention to detail is practiced throughout the entire production cycle until the job is complete.
